TTS MPP - New User Story

Welcome to the TTS MPP! We look forward to working with you to develop your specific and unique user story. The goal of these types of purchase is that fulfilling your user story will address an independent need on your project and can be accomplished in a single one- or two-week sprint.

Before you begin, make sure to have your TTS MPP templates for the Market Research report, Independent Government Cost Estimate (IGCE), and Streamlined Acquisition Plan filled out. The templates can be found in this repo, under the subfolder `Documentation`: https://github.com/fieldsey/TTS-MPP-process/

Also, you'll need to have a PDF file that shows you have approval for this request from your Supervisor and from TTS Finance. Find an email template in the same repo, linked above

This form is automatically collecting email addresses for GSA.gov users.   Change settings

Your user story

Ideally, your user story will follow the format: "As a {type of user}, I want {some goal} so that {some reason}".
Examples of user stories using this template can be found from Mountain Goat Software:
https://www.mountaingoatsoftware.com/agile/user-stories.

The project team will also need to know what your objectives are so we can work out amongst ourselves what will be an acceptable set of deliverables, that upon receipt, will allow us to approve payment.

What is your user story? *

Long answer text

If you had to describe your user story in no more than 5 words, what would you call it?   *

Short answer text

When do you need this by? (This can be an ideal target date if it isn't an   *
